

# Fifth-order passive LPF

## SPECIFICATION

### 1 FEATURES

- TSMC CMOS 0.065  $\mu\text{m}$
- Differential inputs, outputs
- Fixed cut-off frequency: 25MHz, 50MHz, 100MHz
- High linearity
- Low noise figure
- Portable to other technologies (upon request)

### 2 APPLICATION

- IF signal processing

### 3 OVERVIEW

The 5<sup>th</sup> order passive differential low-pass filter (LPF) with fixed cut-off frequency presets. LPF is implemented using integrated inductors. Cut-off frequency switching is performed by switched-capacitor circuit.
