### 3 OVERVIEW

The IP1\_LPF\_01NT1 is the 8<sup>th</sup> order Butterworth low pass filter with cut-off frequency adjustment. The block has two channels of differential inputs and outputs and based on a pseudodifferential circuit and Sallen-Key circuit. CO frequency can be set by the digital code LPF\_ctr<7:0>.

The block is fabricated on TSMC 0.18  $\mu\text{m}$  technology.
