

Low pass filter

SPECIFICATION

1 FEATURES

- TSMC018 SiGe
- Wide cut-off frequency adjustment range (6.5 MHz...23 MHz)
- Low pass filter cut-off frequency adjustment system (LPF CFAS)
- Portable to other technologies (upon request)

2 APPLICATION

- Receivers

3 OVERVIEW

Low pass filter (3rd order Chebyshev filter) is based on the gyrators with cut-off frequency adjustment in wide range. There are two modes for cut-off frequency programming: manually and automatically. The generator is used to adjust filter cut-off (CO) frequency in automatic mode. Also CO frequency can be fixed by the digital code CFAS_Code<6:0>. The block is fabricated on TSMC018 SiGe technology.
